IMPORTANT SAFETY INFORMATION - READ THE FOLLOWING WARNINGS BEFORE YOU OR YOUR CHILD PLAY VIDEO GAMES

AWARNING - Seizures

Some people (about 1 in 4000) may have seizures or black outs triggered by light flashes, such as while watching TV or playing video games, even if they have never had a seizure before.

Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition should consult a doctor before playing a video game.

Parents should watch when their children play video games. Stop playing and consult a doctor if you or your child have any of the following symptoms:

Convulsions

To reduce the likelihood of a seizure when playing video games:

- 1. Sit or stand as far from the screen as possible.
- 2. Play video games on the smallest available television screen.
- 3. Do not play if you are tired or need sleep.
- 4. Play in a well-lit room.
- 5. Take a 10 to 15 minute break every hour.

AWARNING - Repetitive Motion Injuries

Playing video games can make your muscles, joints or skin hurt after a few hours. Follow these instructions to avoid problems such as Tendonitis, Carpal Tunnel Syndrome or skin irritation:

- Take a 10 to 15 minute break every hour, even if you don't think you need it.
- If your hands, wrists or arms become tired or sore while playing, stop and rest them for several hours before playing again.
- If you continue to have sore hands, wrists or arms during or after play, stop playing and see a doctor.

WARNING - Battery Leakage

Leakage of battery acid can cause personal injury as well as damage to your Game Boy. If battery leakage occurs, thoroughly wash the affected skin and clothes. Keep battery acid away from your eyes and mouth. Leaking batteries may make popping sounds.

To avoid battery leakage:

- Do not use nickel cadmium batteries.

Fighting Mode Gameplay

Players compete for the highest score by collecting Gold and Silver Coins in a certain amount of time. One Gold Coin is released from one of the four corners of the map at a time. The four corners are labeled A, B, C and D. The HUD will tell you which corner the current coin is being released from. The number in the upper left of the HUD tells you how much the Gold Coin is worth.

Silver Coins

When you attack other players, you knock a certain number of points out of them, depending on your strength. These points are applied toward the Silver Coin. The Silver Coin is released when the Numerator is higher than the Denominator (look in the upper right corner of the HUD). The Denominator is random for each Silver Coin, but Silver Coins are usually worth a lot more than the Gold Coins.

Multi-Pak Multiplayer Linking

- 3. Player 1 will be the person who plugs the purple connector into his or her game system. This player will be in charge of starting each game when everybody is ready.
- 4. Turn the power switch on each Game Boy® Advance On. From the main menu, all players need to select Fighting Mode.
- 5. Once everyone is visible on screen, Player 1 should press START and proceed with the game.
